# Sharks

The Animal Answer Guide  
Gene Helfman and George H. Burgess

Answering every conceivable question about sharks, authors Gene Helfman and George H. Burgess describe the fascinating biology, behavior, diversity (there are more than 1,000 species worldwide), and cultural importance of sharks, their close relationship to skates and rays, and their critical role in healthy ecosystems.

Helfman and Burgess take readers on a round-the-world tour of shark habitats. They describe huge, ferocious predators. Many shark species are in serious decline and a number are threatened with extinction as a result of overfishing and persecution. *Sharks: The Animal Answer Guide* presents a perfect mix of current science, history, anthropology, intriguing facts, and gripping photographs. Whether your fascination with sharks stems from fear or curiosity, your knowledge of these animals will improve immensely when you consult this book.

"A delightful, engaging, easy-to-read book introducing the cartilaginous fishes and covering their diversity, life histories, and special adaptations, with many fabulous illustrations. The chapters on 'sharks and humans' and 'sharkology' are balanced and refreshing. Helfman and Burgess have certainly done justice to this diverse, interesting, and intriguing group of fishes." —Gregor M. Cailliet, Professor Emeritus, Moss Landing Marine Laboratories, and Director, Pacific Shark Research Center

"A wonderfully written and informative book that will be sure to excite and stimulate a new generation of shark biologists for years to come." —Philip Motta, University of South Florida

"This book is sheer delight to read. The answers to every shark question imaginable are presented in wonderful depth. It's a great book for anyone interested in a factual and broadly informative guide to all things "sharky." I highly recommend it." —Adam P. Summers, Friday Harbor Laboratories, University of Washington

**Gene Helfman** is a professor emeritus at the Odum School of Ecology's Program in Conservation Ecology and Sustainable Development, University of Georgia. He is co-author of *Fishes: The Animal Answer Guide*, also published by Johns Hopkins.  
**George H. Burgess** is coordinator of museum operations and director of the Florida Program for Shark Research at the Florida Museum of Natural History.
